

# Alaska Content Standards Geography A

A

A student should be able to make and use maps, globes,  
and graphs to gather, analyze, and report spatial (geographic)  
information.

A student who meets the content standard should:

use maps and globes to locate places and regions;

make maps, globes, and graphs;

understand how and why maps are changing documents;

use graphic tools and technologies to depict and interpret the world's  
human and physical systems;

evaluate the importance of the locations of human and physical features  
in interpreting geographic patterns; and

use spatial (geographic) tools and technologies to analyze and develop  
explanations and solutions to geographic problems.
