

# Alaska Content Standards

## Geography F

F

A student should be able to use geography to understand the world by interpreting the past, knowing the present, and preparing for the future.

A student who meets the content standard should:

- analyze and evaluate the impact of physical and human geographical factors on major historical events;
- compare, contrast, and predict how places and regions change with time;
- analyze resource management practices to assess their impact on future environmental quality;
- interpret demographic trends to project future changes and impacts on human environmental systems;
  
- examine the impacts of global changes on human activity; and
- utilize geographic knowledge and skills to support interdisciplinary learning and build competencies required of citizens.
