## Klondike Miner's Checklist

Directions: Write down 20 essential items you will need on your journey to the Klondike. All of your supplies must be consistent with the type of goods that were available during the late 1800s. You will need to haul your supplies over Chilkoot Pass to Lake Bennett ( a 33-mile trip), build a boat, and travel about three weeks, or 500 miles, to Dawson. You will also need mining supplies once you reach Dawson. Prioritize your supplies from most important to the least important.

| 9. _____  | 19. _____ |
| 10. _____ | 20. _____ |

**The following questions will be answered AFTER consulting the primary sources:**

Question 1: Which items did you list that are also supported by the primary sources? Place a check next to these items.

Question 2: After reviewing the primary sources, which items would you cross off the list? Which items would you add to the list.

Question 3: Which items listed in the primary sources do you believe were *not* necessary for the trip to Dawson? Why do you suppose they were listed in the publication?

---

---

---

---

Question 4: If you were interested in finding out exactly what supplies you needed to make it to Dawson, what other primary sources could you investigate?
